Galeries Lafayette Haussmann, a place full of history.

Galeries Lafayette Haussmann opened their doors for the first time during the French 3rd Republic, in 1894. In 1912, the most spectacular piece of the Parisian store is constructed: the sumptuous Dome. The achievement of this masterpiece, ornamented with colored stained glass and ironwork, marks the beginning of the historical relationship between Galeries Lafayette and creation. Every day, the visitors of boulevard Haussmann store turn this place of commerce in an emblematic Art Nouveau monument.

With a 45 minutes visit, in French or in English, for young and old, visitors will have the opportunity to discover the secrets of the department store through a playful and interactive itinerary, describing the birth of Parisian department stores and the evolution of Galeries Lafayette since 1894.
